

Pediatric Inflammatory Bowel Diseases Updates

A Primary Care Grand Rounds

Live CME Webinar

Wednesday, May 7, 2024

6:30 - 7:30 PM

Why is this important?

About 25% of IBD cases develop before age 20, with 4% diagnosed before age 5 and 18% before age 10, peaking in adolescence. Each year, approximately 10 in 100,000 children are diagnosed with IBD, affecting an estimated 70,000 children in the U.S. Primary care providers are often the first to identify symptoms in pediatric patients. This educational activity focuses on early diagnosis, effective management, and emerging therapies to enhance care for children with IBD.

Educational Credits

Endeavor Edward-Elmhurst Hospitals are accredited by the Illinois State Medical Society (ISMS) to provide Continuing Medical Education credit to physicians. Edward-Elmhurst Hospitals designates this activity for a maximum of 1.0 AMA PRA Category 1™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Successful completion of this CME activity enables the participant to earn up to 1.0 ABIM MOC points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) Program.

Presented by:

Ranjana Gokhale, MD

Pediatric

Gastroenterologist

Objectives

At the conclusion of this activity, participants will be able to:

- Describe the clinical presentations of pediatric inflammatory bowel disease IBD.
- Explain new concepts regarding the pathogenesis of IBD.
- Identify extraintestinal presentations associated with IBD.
- Analyze the rationale for the use of newer medical therapies in IBD.
