Philosophy Of Care

I believe that taking care of patients is a privilege. I value compassionate and empathetic care while also delivering cutting edge neurosurgical treatments. It is very important to me that patients feel heard, have a chance to have all their questions answered, and feel supported while making the most informed decisions regarding their neurosurgical care. I welcome and encourage the involvement of loved ones in the decision-making process and care of my patients. And I am prepared to be there every step of the way to guide my patients and their loved ones on their treatment journey.
