

2024 – 2025 Enduring Neuroscience Program

Idiopathic Intracranial Hypertension

Presented by: Ramez Abdalla, MD

Crew Resource Management:

What Medicine Has and Has Not Learned from Aviation.
Presented by: G Alexander Jones, MD

Release date and expiration:

5/13/2024 – 5/13/2025

Time to complete:

60 minutes.

Location:

Online Enduring

Registration:

Registration required to claim credit. Visit the CME Website:

Managing Idiopathic Intracranial Hypertension (IIH) remains tough despite medical progress, mainly due to severe headaches and the risk of vision loss. IIH affects 1 to 2 people per 100,000 yearly, with a higher rate among obese females aged 15 to 44 (4 to 21 per 100,000). This activity discusses integrating Crew Resource Management (CRM) principles to improve procedure outcomes. It also examines how medicine can learn from aviation safety, comparing safety protocols. Healthcare professionals will gain insights into IIH treatment, endovascular stenting, and enhancing patient care with CRM principles.

Program Objectives: At the conclusion of this live activity, participants should be able to:

1. State the treatments for idiopathic intracranial hypertension.
2. Explain the role of endovascular stenting in idiopathic intracranial hypertension.
3. Compare checklists and timeouts in aviation safety to those in operative procedures.

Endeavor Health: Edward-Elmhurst Hospitals Accredited CME Program designates this live activity for a maximum of **1.0 AMA PRA Category 1 Credit™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Endeavor Health: Edward-Elmhurst Hospitals Accredited CME Program is accredited by the Illinois State Medical Society to provide continuing medical education for physicians.
