

2024 EEH Enduring Program: Updates in Allergies, Asthma and Atopic Dermatitis

Presented by: Zachary Rubin, MD

- Date:** Enduring Material – Available Online: 4/25/2024 – 4/25/2025
- Time/Place:** Online – Available anytime.
- Registration:** Registration required for enduring CME events. **Due to requirements of our CME accreditation, credits are not applied to transcripts until participants complete the post-test and required evaluations for enduring material.*
-

The World Health Organization reports that asthma significantly impacts global health, affecting an estimated 262 million people and resulting in around 461,000 deaths worldwide in 2019. This educational program aims to address this challenge by discussing the latest asthma management research and clinical advancements. Effective and personalized care strategies may reduce these figures. This activity will also cover the latest in treating atopic dermatitis and managing food allergies and anaphylaxis. In the United States, food allergies are responsible for roughly 3.4 million emergency department visits each year. Primary Care Providers are often the first point of contact for patients seeking help and are crucial in diagnosing, treating, and preventing these conditions. This course highlights the vital role of primary care in patient education and the prevention of allergic or asthmatic reactions.

Program Objectives: At the conclusion of this live activity, participants should be able to:

1. Discuss the latest research and clinical updates in asthma management.
2. Review recent advancements in the management of atopic dermatitis.
3. Integrate management plans for patients with food allergies and anaphylaxis.

Endeavor Edward-Elmhurst Hospitals designates this live activity for a maximum of **1.0 AMA PRA Category 1 Credit™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
